PATENTS

## 01 EXPERIENCE

2023 — Present

Teesside University

### Professor of Digital Health Interventions

- Principal Investigator for research on 1) remote patient monitoring of balance and falls risk, 2) AI clinical decision support and 3) AI-informed Triage
- External funding won from Academy of Medical Sciences, NIHR and EPSRC
- Co-Director of Centre for Healthcare Innovation, Mentor, PhD Supervisor
- Building health technologies for remote gait monitoring and vitals monitoring

2016 — 2023

NURVV Ltd

### Head of Research

- Led R&D for wearable technology products in sport and healthcare; shaped strategy and product roadmap; led and line managed the biomechanics team
- Co-created sensor algorithms and app features for “NURVV Run” product; developed 6 patents on smart insole technology
- Directed product testing programmes with external partners
- Created product propositions and pitches for investors and strategic partners

2001 — 2016

University of Bath

### Reader / Associate Professor / Assistant Professor

- 85+ articles, 120+ presentations, H-Index 33; £1.5M research funding secured (2005–2016)
- Led Injury Prevention Research Group — international sports policy impact; Universities UK "Made at Uni" award
- Supervised 13 PhD, 20 MSc, 80 BSc students; Programme Director and teaching modules for BSc/MSci Sports Science

## 02 EDUCATION & QUALIFICATIONS

Jan 2026

### AI in Healthcare Executive Program

MIT Sloan School of Management

May 2016

### Agile PM Foundation & Practitioner

APMG International

July 2001

### PhD in Biomechanics

Loughborough University — "Marker-free Tracking of Human Motion"

July 1997

### BSc Sports Science — First Class Honours

Loughborough University

### 03 CORE COMPETENCIES

- Innovation, Strategy & Process**
    - Full product development lifecycle from ideation through market delivery
    - Qualified AgilePM practitioner; Agile processes embedded at NURVV
    - Securing external funding; effective stakeholder and investor liaison
  - Managing & Mentoring People**
    - Built diverse R&D teams through open culture and structured 1-to-1s
    - Extensive management and mentoring of researchers and postgraduate students
    - Cross-functional collaboration: product, engineering, firmware, app and marketing
- Leading Research & Development**
    - Interdependent product testing programs across external partner networks
    - Applied research with quantifiable real-world policy impact in sport/healthcare
    - Live integration of AI Triage in NHS settings (Visiba Ltd collaboration)
  - Data Science & Programming**
    - Python (Pandas, NumPy, Scikit-learn); 20 years Matlab; R; signal processing
    - ML/AI: hierarchical clustering and neural networks for biomechanics; PGM for AI Triage
    - Anvil web apps, Kotlin, Claude Code / AI tooling — new workflows

### 04 PROFESSIONAL SKILLS

| INDUSTRY KNOWLEDGE        | TECHNICAL & SCIENTIFIC         | ADDITIONAL                       |
|---------------------------|--------------------------------|----------------------------------|
| R&D Leadership            | Python                         | Product QA & UX Testing          |
| Agile PM                  | Matlab                         | App Feature Logic & UI           |
| Wearable Technology       | R                              | Presentation Skills              |
| Remote Patient Monitoring | ML / AI                        | Mobile App Development           |
| Management & Mentoring    | Multimodal AI Triage           | Physical Computing               |
| Product Development       | Biomechanics Measurement       | Blender / Maya                   |
| Media / Investor Pitches  | Signal Processing & Statistics | Sport Coach – Cricket & Football |
| Lecturing / Teaching      | OpenSim – MSK Simulation       |                                  |
|                           | Claude Code                    |                                  |

### 05 CURRENT PROJECTS

#### Unobtrusive Clinical Decision Support Tools

|                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                     |
